

How to tag a docker image

1. List your images
2. Tag your image
3. Delete old image

List your images:

```
[root@nuc1 ~]# docker images
```

REPOSITORY	TAG	IMAGE ID	CREATED	SIZE
centos-ansible	latest	4aaa1f8b3107	13 minutes ago	428 MB

Rename the image using the IMAGE ID:

```
root@nuc1 ~]# docker tag 4aaa1f8b3107 centos_ansible
[root@nuc1 ~]# docker images
```

REPOSITORY	TAG	IMAGE ID	CREATED	SIZE
centos-ansible	latest	4aaa1f8b3107	13 minutes ago	428 MB
centos_ansible	latest	4aaa1f8b3107	13 minutes ago	428 MB

Remove the old image:

```
[root@nuc1 ~]# docker rmi centos-ansible
Untagged: centos-ansible:latest
[root@nuc1 ~]# docker images
```

REPOSITORY	TAG	IMAGE ID	CREATED	SIZE
centos_ansible	latest	4aaa1f8b3107	13 minutes ago	428 MB
